MULTI-BUNK LOADING SYSTEM

BEING SHOWN FOR THE FIRST TIME AT
AWFS 2019
BOOTH #7081 / 8225
JULY 17 - 20, 2019 | LAS VEGAS

AUTOMATE WITH ANDERSON

The **ALL-NEW Anderson MLS (MULTI-BUNK LOADING SYSTEM)** is designed to load full sheets of panel material automatically on to an Anderson or an Omnitech full-line CNC router. This system greatly reduces the loading time which will immediately increase your productivity & profitability!

KEY FEATURES & ADVANTAGES:

- System available with 2, 4, or 6 pre-staged lifts of material
- Uses the same FANUC controller as the CNC router!
- No communication issues between various control platforms
- Can load from full bunks of material of up to 48" in overall height
- LIFTS material & places it onto the staging conveyor without dragging it and potentially damaging the panel.
- No need for indexing scissor lifts systems
- Provision of material squaring posts allow material to be loaded from either side of the machine
- An 8' opening allows you to load the material directly from a forklift
- Entire system fits under a 10' ceiling height
- Economically priced to be paired with our legendary Stratos Pro, Omnitech, or Andimaxx automated processing lines.
