TigerSaw 2000™

Fast, accurate crosscutting saw system featuring Dynamic Optimization for onthe-fly nesting of non ferrous materials.

Automated Saw System

Unparalled Cut Quality

TigerSaw 2000 is the perfect automated saw station for cutting all types of non-ferrous metals fast and accurately.

With multiple configurations, TigerSaw 2000 can be configured to push up to 2100 lbs (952 kg). Improved pneumatic clamping options prevent damage to fragile or sensitive materials.

We take cut quality seriously. Thats why TigerSaw 2000 has an air over oil saw stroke cylinder and an industry leading lubrication system that follows the blade to put lubrication exactly where you need it. Take controll of your cut

Mix and Match Clamping

TigerSaw 1000 offers 3 clamping styles that can be used separately or together to deliver the exact clamping solution you need.

Accuracy at any Weight

TigerSaw 2000[™] can be configured with a TigerStop $^{\mathbb{R}}$, TigerTurbo $^{\mathbb{T}}$ or a HeavyDuty $2^{\mathbb{T}^{\mathbb{M}}}$. Choose to outfit TigerSaw with pushing capacity of up to 2100 lbs (952 kg) or set it up for speed with a maximum pushing speed of 180 ft/min.

Adjustable Cutting Envelope

TigerSaw 2000[™] features an unique adjustable cutting envelope which increases the range of material profiles you can cut. It comes with saw blades from 350 mm to 500 mm, with adjsutable ranges from 5 x 6 inch to 1 x 15 in on a 450 mm blade and 6 inch x 6 inch to 1 inch 16 inch on a 500 mm blade.

Software to Increase Productivity

A high volume machine needs high volume software solutions. TigerSaw 2000 connects to almost any design software to quickly load your parts lists. Then print custom information right on each part for easy identification. Don't feel like going back to your desk to load parts lists? Use the TigerTouch touch screen interface and take full command.
