

Panel Sanding Assistant

Autonomous Robotic Sanding Powered by AutonomyOS™

The Panels Sanding Assistant offers autonomous sanding quality and performance In its simplest form.

Main Components

Industrial 3D Camera (IP67)

Fanuc CRX-25iA cobot (IP67)

Standard pneumatic orbital sander (square)

OmniBrain™ (Fanless industrial Server)

Operator friendly control panel

Generals Properties

Machine Footprint	3×3m (120×120")
Required # of operators	From 1/2 to 2 people per machine, depending on the amount of secondary operations (manual) required and your team's organization.
Warranty	1 Year on main components

Sanding Capacity

Purpose	Sanding raw MDF or hardwood and denibbing primed/painted panels
Panel size Capacity	Min. size: 100×100mm (4×4") Max. size: 2032×914mm (80×36")
Pocket size capacity	Min. pocket size: 92×116mm (3.6×4.5")
Productivity	Up to 500 panels per 8h, 135m ² (1458ft ²)* *Depending on the sanding parameters and loading conditions
Motion Precision	0.1mm accuracy from detected edge
Power Tool	1 - 45 Newton

Admin Ajustable Parameters

Tool Advance Rate	1 to 300mm/s (0.04 to 11.8"/s)
Tool Force	1 to 50 Newtons (0.22 to 11.2 lb-f)
Passes Overlap	0 to 100%
Number of Passes	Single or multiple
Motion Precision	0.1 mm accuracy from detected edge
Media Type	Up to 3 different grits (120 to 400)

Power Requirements

Electrical	208 to 240 VAC @ 15A.
Vacuum (min.)	1.5 kPa @ 20m ³ /min (6" of water @ 700 cfm)
Pneumatic	5.5 bar @ 480 lpm (80 psi @ 17 cfm)
Environment	Temperature 0 - 45°C (32 - 113°F) Humidity 0% - 90% non-condensing

Panel Sanding Assistant

Autonomous Robotic Sanding Powered by AutonomyOS™

Supported Style*	
	Flat panels
	Flat center panels with raised flat frame. Corner or fine moldings must be sanded by hand.
	Frame only (no center panel)
	dimension cavity (less than 92mm wide)
	Perforated or grooved flat panels
	Flat center panels with minimally raised thin flat frame
	Multi-cavity panels with asymmetrical framing

*The size of the panel must be less than or equal to 2032×914mm (80×36")

Unsupported Styles*	
	Cathedral or fretwork panels
	Shaped central corner panels
	Raised flat frame with molding

*Panel sizes larger than 2032×914mm (80×36") are not supported

Material Supported	
	Raw MDF
	Raw Wood
	Varnished Wood
	Primed MDF or Wood
	Painted MDF or Wood
